

**演題**：「Agricultural and Biological Engineering for a sustainable world」

**日時**：平成 25 年 10 月 28 日 15:00-16:00

**講師**：Lalit R. Verma (American Society of Agricultural and Biological Engineers)

**教室**：東京大学農学部 7 号館 A 棟 7 階 716 号室 (会議室)

**要旨**： The presentation will highlight the role of ASABE and the profession of Agricultural and Biological Engineers in addressing the global grand challenges in food, water and energy systems. Agricultural and Biological Engineers have a rich history of providing sustainable solutions to problems faced in meeting the essential needs of global population – safe and nutritious food, abundant water, clean air, renewable energy, and economic opportunity. Since 1907, ASAE (now ASABE) has been active in promoting the Agricultural and Biological Engineering profession. This responsibility remains critically important today in the global arena. ASABE is committed to promoting our expertise and importance in sustainably
